

# SKU-Level Visibility

## Increase SKU-Level Visibility with Shippabo

Achieve the inventory turn and pre-planning capabilities your supply chain needs to thrive. With Shippabo, you can track all shipment details from anywhere, at any time – and plan accordingly. Finally.

### Track Shipments From End-To-End

Better inventory control is easy, when you can access shipment details in just a few clicks. Shippabo's SKU-level visibility extends across every stage of your supply chain.

- Add SKU information to your Purchase Order off the bat
- Quickly find out cost, duties and freight, and number of units in transit
- Track U.S. Customs statuses and delivery notifications
- Track shipment location in real time

### Review SKU Unit Cost

Accurately plan around your product prices. With Shippabo, you have visibility into SKU-level cost of goods sold with duties and freight.

Keep product landed cost top of mind and easily accessible. You can review cost by SKU number, origin country, or factory. Want to share the findings? Export a complete list of your products with their landed costs.

### Forecast for the Future

Leverage SKU-level visibility to inform future shipments. Shippabo's forecasting tools help you understand and optimize your supply chain.

Uncover trends on shipment deliveries, inventory progress, SKU performance, and freight spend. Quickly generate reports tailored to the shipment views and SKU performances you need. Accurately determine inventory levels and product prices with your arsenal of centralized data.

Through it all, you can turn to our team of shipping experts for help. Connect with us for strategic support on increasing your supply chain visibility.

Shippabo's cloud-based management platform brings greater visibility, pricing, collaboration, and actionable data to every shipment.
