

Pre-Planning Works: The Shippabo Advantage

For importers that want efficient freight forwarding, predictable costs, and real-time visibility on shipments

Our Operations Team

Our teams work proactively with your suppliers across the globe. Our centralized platform builds a bridge to communicate, plan, and allocate your resources to their best ability and maximum efficiency. All of these factors bring more predictability and consistency to your supply chain.

Your Financial Advantage

Pre-planning helps you to lock in Shippabo's competitive pricing. Why try your luck on the spot market when you could have your availability settled? Our container forecasting starts sixty days in advance. Having the advantage of complete visibility prevents negative consequences for you by minimizing human error and shielding you from fluctuations in the market. With pre-planning, you can better equip every line of business as your point of view now includes cargo ready dates for all shipments and upcoming orders so you can manage inventory accordingly.

Your Strategic Advantage

As soon as your manufacturers issue your POs, Shippabo allows you as the importer to pre-plan your shipments. This secures space much earlier than your competitors and dramatically improves your chances of loading. In addition, the platform offers a single source of truth for all shipment updates and communications with suppliers and vendors. You can even bring your own supply chain network #BYON!

Why Our Pre-planning Works: The Shippabo Advantage

Not only do we have one of the best Operations Teams around, competitive and fixed pricing options, and an incredible platform to support you every step of the way: but we also have you. This is a partnership that we take seriously. We want to provide beyond visibility - insight. With Shippabo's pre-planning, you now can create custom views or scheduled reports showing you a bird's eye view of all the shipments you have in the planning stage.

Don't wait for peak season to sneak up on you. Connect with our team today for a free assessment on how you can turn your supply chain into an operations powerhouse.
